1. Principles of corporate governance which the Company issuer is subject to

In 2016 Cyfrowy Polsat S.A. was subject to the set of principles of corporate governance in the form of the "Best Practices of WSE Listed Companies in 2016" ("Best Practices 2016"), constituting an appendix to resolution No. 26/1413/2015 of the Council of WSE of October 13, 2015. The rules set out in the Best Practices 2016 came into force on January 1, 2016. The document is available on the official website of the Warsaw Stock Exchange dedicated to the issues of the corporate governance of listed companies, at <http://corp-gov.gpw.pl>.

Application of principles of corporate governance

Following the entry into force of the Best Practices 2016 on January 1, 2016, the Management Board of the Company has adopted the recommendations and principles specified in the aforementioned document, except for the recommendations included in items II.R.2., III.R.1., IV.R.2., VI.R.1., VI.R.2., VI.R.3. and the detailed principles included in items I.Z.1.3., I.Z.1.16., I.Z.1.20., II.Z.1., II.Z.7., III.Z.1., III.Z.2., III.Z.4., III.Z.5., IV.Z.2., V.Z.6., VI.Z.4. At the same time, the Management Board decided that the recommendations and detailed principles, marked as items I.Z.1.10., III.Z.6., VI.Z.1. and VI.Z.2. do not apply to the Company.

Pursuant to § 29 section 3 of the Warsaw Stock Exchange Rules, on January 29, 2016, the Company published via the Electronic Information Base (EIB) system Report no. 1/2016/CG on non-compliance with detailed principles included in the set of Good Practices 2016. At the same time, the Company published on its website – according to the requirements of the principle I.Z.1.13. – information about the application by the Company of the recommendations and principles included in the Best Practices 2016.

The Company does not comply or complies partially with the below mentioned recommendations and detailed principles included in the Best Practices 2016:

- **Recommendation I.R.2.**, stating that where a company pursues sponsorship, charity or other similar activities, it should publish information about the relevant policy in its annual activity report, is applied within a limited scope. The Company has not implemented a formal policy regarding sponsoring or charity activities. Nonetheless, Polsat Group pursues numerous activities of this nature, including support for sports, or cooperation with numerous foundations and public benefit organizations. The description of the pursued activities is included in the Management's report on the activities of Cyfrowy Polsat Group in 2016 in item 2.8 – *Other aspects of our business – charity and sponsorship activities*.
- **Recommendation II.R.2.**, stating that where decisions to elect members of the management board or the supervisory board of a company should ensure that the composition of these bodies is comprehensive and diverse among others in terms of gender, education, age and professional experience. The Company has not developed and does not pursue a diversity policy with regard to the Company's governing bodies and key managers. The members of the Supervisory Board and the Management Board as well as key managers are elected, respectively, by the General Shareholders Meeting, the Supervisory Board and the Management Board while taking into account the qualifications, the experience and the competence of the candidates. Factors such as gender are not taken into account while electing members of the Company's governing bodies and key managers. The Company's authorities are of the opinion that such an approach guarantees the election of the most appropriate persons for managerial and supervisory functions.
- **Principle II.Z.1.**, stating that the internal division of responsibilities for individual areas of the company's activity among management board members should be clear and transparent. As a consequence the Company also does not apply the **principle marked as I.Z.1.3.**, requiring the publication of a chart describing that division on the company's website. The Commercial Companies Code provides that in a joint stock company matters are managed by the Management Board in a collective manner, while a formal division of duties can be introduced optionally. The Company has elected not to comply with this principle, among others due to the on-going process of operational integration inside Polsat Group. Due to the broad scope of responsibilities of each Management Board Member, it is impossible, both within the entire capital group, as well as in individual companies, to define and allocate specific tasks and responsibilities to respective Board Members.
- **Principle II.Z.7.** regarding the application of the provisions of Annex I to the Commission Recommendation 2005/162/EC of February 15, 2005 with respect to the tasks and the operation of the committees of the Supervisory Board. The Company does not fulfill all the detailed requirements regarding the functioning of supervisory board committees as indicated in the above mentioned Annex I to the Commission Recommendation.

Principles governing the creation, composition and operations of specific committees of the Supervisory Board are set out in § 7 of the Supervisory Board By-laws.

At the current stage of operations of the Supervisory Board Committees, Company authorities do not see the need for introducing more detailed regulations governing the functioning of these committees

- **Recommendation III.R.1.**, stating that the company's structure should include separate units responsible for the performance of tasks in individual systems or functions, (that is internal control, risk management and compliance systems, as well as an internal audit function). An Internal Audit and Internal Control unit operates in the Company. No organizational units responsible for tasks related to risk management and compliance have been set up within the Company's structure. Nonetheless, relevant internal processes and procedures have been implemented and are in place to guarantee effective financial and operational risk management as well as monitoring the compliance of the Company's operations with regulations in force. In the Management Board's opinion, the internal regulations and processes covering risk management function properly and effectively, and setting up of dedicated units responsible for risk management and compliance will not improve the efficiency of these processes and procedures in a substantial degree. At the same time, the Management Board is of the opinion that the cost associated with setting up and maintaining the above-mentioned organizational units will be incommensurate to the benefits offered by them.
- Due to the fact that the Company has not implemented centralized, formal risk and compliance management systems, the Company does not apply **the principles marked as III.Z.1., III.Z.2., III.Z.4. and III.Z.5.** within the scope related to the internal control and internal audit system existing in the Company's organizational structure.

Numerous internal procedures and processes are in place in the Company with regard to operational and financial risk management, including the process of drafting of financial statements. These procedures ensure effective identification and monitoring of various types of risks at the level of respective organizational units and they also provide for actions to be taken in the event a given risk materializes. High level managers, reporting directly to the Company's Management Board, managing the areas covered by respective procedures, are responsible for ensuring effective and correct operation of these procedures.

In spite of the lack of a centralized compliance system, the control of the Company's compliance with legal regulations in respective areas is regulated by internal corporate regulations and takes place at the level of individual organizational units, which deal with a relevant area of activity.

The Management Board carries out on-going verification of the correctness of functioning of internal processes in the areas of risk management and regulatory compliance, and takes necessary actions when needed. The Supervisory Board, and in particular the Audit Committee, monitors and evaluates the effectiveness of functioning of internal processes with regard to operational and financial risk management, including the process of drafting of financial statements, based on documents and reports submitted by the Management Board and a person responsible for the internal audit as well as other information obtained during the daily business activities of the Supervisory Board.

- **Recommendation IV.R.2.**, stating that the company should enable its shareholders to participate in a general meeting using means of electronic communication, in particular through:
 - real-time broadcast of the general meeting;
 - real-time bilateral communication where shareholders may take the floor during a general meeting from a location other than the general meeting;
 - exercise of the right to vote during a general meeting either in person or through a plenipotentiary.

Ensuring the smooth running and the validity of the resolutions adopted by the General Meeting are the priorities of the Management Board. The relatively small popularity of the practice of conducting General Meetings using electronic means of communication and insufficient readiness of the market may lead to an increased risk of organizational and technical problems, which may disturb the smooth running of the General Meeting, as well as a risk of possible questioning of the resolutions passed by the General Meeting, in particular due to the occurrence of technical defects. Furthermore, domestic and foreign investors have not reported to the Company their interest or need of organizing General Meetings in this form. In view of the above, the Management Board decided not to apply the said recommendation permanently.

- **Principle IV.Z.2.**, about ensuring publicly available real-time broadcasts of general meetings. As a consequence, the Company also does not apply **the principles marked as I.Z.1.16. and I.Z.1.20.**, which recommend publishing on the

Company's website of information regarding the planned transmission and the recordings of general meetings in either audio or video form. An efficient course of proceedings of general meetings as well as cost optimization are priorities for the Management Board. The Management Board makes every effort to ensure that the documentation, as well as the proceedings of general meetings ensure transparency and protect the rights of all shareholders. Information regarding draft resolutions and adopted resolutions, as well as additional materials, is disclosed in the form of current reports and published on the Company's website, thus enabling equal access to information on the matters addressed at general meetings for all stakeholders. In view of the above, the Management Board is of the opinion that ensuring real-time coverage of general meetings and providing access to recordings of such meetings would not be economically justified. At present the Management Board plans no changes to the manner in which general meetings are organized.

- **Principle V.Z.6.**, stating that in its internal regulations, the company should define the criteria and circumstances under which a conflict of interest may arise in the company. The Company's internal regulations related to prevention, identification and solving of conflicts of interests do not meet the requirements of principle V.Z.6. In particular, they do not include a list of criteria and circumstances under which a conflict of interest may arise in the Company. In accordance with § 3 item 4 of the Supervisory Board By-laws and § 3 item 3 of the Management Board By-laws, a Supervisory Board Member or a Management Board Member should inform the Supervisory Board, or both the Management Board and the Supervisory Board - in the case of a Management Board Member - of any existing conflict of interests, or the possibility of its emergence, and such an individual should refrain from participation in discussions or voting on resolutions related to a matter in which there exists a conflict of interests. In the opinion of the Company's Management Board, current internal regulations properly address the principles of conduct in a situation of conflict of interests.
- **Recommendation VI.R.1.**, stating that the remuneration of members of the company's governing bodies and key managers should follow the approved remuneration policy and **recommendation VI.R.2.**, stating that the remuneration policy should be closely tied to the company's strategy, its short- and long-term goals, long-term interests and results, taking into account solutions necessary to avoid discrimination on whatever grounds.

The Company will not comply with recommendation VI.R.1. due to the fact that a formalized remuneration policy covering the members of the Company's authorities and its key managers has not been implemented in the Company. Nonetheless, individual corporate documents and internal regulations define the manner of determining the remuneration of the members of the Company's authorities and its employees.

In accordance with article 24 d) of the Company's Articles of Association, the remuneration of the members of the Supervisory Board requires a resolution of the General Meeting, except for the members of the Supervisory Board delegated to temporarily perform functions of a member of the Management Board, pursuant to article 19 2d) of the Articles of Association, when the decision is taken by the Supervisory Board. The remuneration relates to the scope of tasks and responsibilities related to the function performed, reflects the size of the Company and keeps a healthy relation to its financial results. In accordance with article 19, item 2 g) of the Company's Articles of Association, the principles of remuneration of Management Board Members are defined by the Supervisory Board, with the remuneration corresponding to the scopes of duties and responsibilities of respective Management Board Members.

In accordance with the Employee Remuneration Regulations valid in the Company, determination of the structure and the amounts of remuneration of key managers is the competence of the Management Board.

- **Recommendation VI.R.3.**, stating that If the supervisory board has a remuneration committee, principle II.Z.7. applies to its operations. A Remuneration Committee operates as a standing committee of the Supervisory Board. The Company does not fulfill all the detailed requirements related to functioning of the Remuneration Committee as listed in Annex I to the Commission Recommendations discussed in principle II.Z.7.

Principles governing the creation, composition and operations of specific committees of the Supervisory Board are set out in § 7 of the Supervisory Board By-laws. At the current stage of operations of the Supervisory Board Committees, Company authorities do not see the need for introducing more detailed regulations governing the functioning of the Remuneration Committee.

- **Principle VI.Z.4.**, regarding providing of general information on the Company's remuneration policy. The Company does not have a formalized remuneration policy for the members of the Company's authorities and its key managers. Pursuant to article 24 d) of the Company's Articles of Association, the remuneration of the Supervisory Board Members is determined by the General Meeting, save for the remuneration of the Supervisory Board Members who have been temporarily delegated to perform the duties of a Management Board Member by virtue of article 19 item 2d) of the

Company's Articles of Association. In such a situation the decision is taken by the Supervisory Board. The amount of the remuneration depends on the scope of tasks and responsibilities of a function and it also corresponds to the size of the Company, while being in a reasonable proportion to its financial performance.

In accordance with article 19, item 2 g) of the Company's Articles of Association, the principles of remuneration of Management Board Members are defined by the Supervisory Board, with the remuneration corresponding to the scopes of duties and responsibilities of respective Management Board Members. In accordance with the Employee Remuneration Regulations valid in the Company, determination of the structure and the amounts of remuneration of key managers is the competence of the Management Board.

Nonetheless, it should be underscored that in accordance with the regulations related to information disclosure, the Company presents, in its annual report, general information regarding the remuneration principles valid in the Company as well as the information regarding the remuneration obtained in a given financial year by Management Board Members and Supervisory Board Members, while indicating the fixed and the variable components. The presented information also indicates the rules of payment of severance pay and other payments on account of termination of employment

2. Internal control systems and risk management applied with respect to the process of preparing financial statements

The Management Board is responsible for our internal control system and its effectiveness in the process of preparing financial statements and interim reports prepared and published in accordance with the provisions of the Ordinance of the Minister of Finance of February 19, 2009 regarding current and periodic information to be submitted by issuers of securities, and the conditions for recognizing equivalence of information required under non-member states regulations.

We draw on our employees' extensive experience in the identification, documentation, recording and controlling of economic operations, including numerous control procedures supported by modern information technologies used for recording, processing and presentation of operational and financial data.

In order to ensure the accuracy and reliability of the accounts of the parent and subsidiary companies, we apply Accounting Policies for Cyfrowy Polsat S.A. Group and various internal procedures relating to transaction control systems and processes resulting from the activities of the Company and the Group.

We keep our accounts in the computer systems integrated with the underlying source systems and auxiliary books. We ensure data security through the use of access rights on the need-to-know basis granted to authorized users. Systems operations are assured by the specialists with extended experience in this field. In addition, the system security is ensured by applying the appropriate solutions for physical security of the equipment. We have a complete IT system documentation in all its areas. In accordance with Article 10 of the Polish Accounting Act of September 29, 1994, the accounting information systems documentation is periodically reviewed and updated upon approval by heads of units.

An important element of risk management, in relation to the financial reporting process, is ongoing internal controls exercised by the Finance and Controlling department and the Internal Audit department.

The Internal audit functions on the basis of the Audit Charter adopted by the Management Board and the Audit Committee of the Supervisory Board. Its primary task is to test and evaluate controls for the reliability and consistency of financial data underlying the preparation of financial statements and management information.

The Controlling department functions on the basis of financial controlling system and business controlling system, and exercises control over both the current processes and the implementation of financial and operational plans, and preparation of financial statements and reports.

An important element of quality control and data review is the use of management standalone and consolidated reporting system, as well as regular monthly analysis of financial and operational performance and key indicators performed by the Management Board. The monthly results analysis is carried out in relation to both the current financial and operational plan and the prior period results.

The budgetary control system is based on monthly and annual financial and operational plans and long-term business projections. Both financial and operating results are monitored regularly in relation to the financial and operational plans.

During the year, we perform additional reviews of the financial and operational plans for the year if such need arises. The financial and operational plans are always adopted by the Management Board and approved by the Supervisory Board.

One of the basic elements of control in the preparation of financial statements of the Company and the Group is verification carried out by independent auditors. An auditor is chosen from a group of reputable firms, which guarantee a high standard of service and independence. The Supervisory Board of the Company chooses the Company's auditor. In the subsidiaries, the auditor is chosen by either the Supervisory Board, the General Meeting or the Meeting of Shareholders. The tasks of the independent auditor include, in particular: a review of semi-annual standalone and consolidated financial statements and audit of annual standalone and consolidated financial statements. Auditor's independence is fundamental to ensure the accuracy of the audit.

An audit committee, appointed within the Company's Supervisory Board, supervises the financial reporting process in the Company. The Audit Committee oversees the financial reporting process, in order to ensure sustainability, transparency and integrity of financial information. The audit committee includes two members of the Supervisory Board, who meet the independence criteria set out in the Best Practices 2016 in section II.Z.4. and the requirements of the Act of May 7, 2009 on chartered auditors and their governing bodies, entities entitled to audit financial statements and on public supervision, in article 86 item 4.

Moreover, under article 4a of the Polish Accounting Act of 29 September 1994 of the accounting act, the duties of the Supervisory Board include ensuring that the financial statements and the report on activities meet the requirements of the law, and the Supervisory Board carries out this duty, using the powers under the law and the articles of association of the Company. This is yet another level of control exercised by an independent body to ensure the accuracy and reliability of the information presented in the standalone and consolidated financial statements.
