## Disney+ for free in Netia, Plus and Polsat Box

Polsat Plus Group is the only operator of pay TV and communication services in Poland to offer Disney+ service on the day of its launch in Poland, that is in June this year.

Packages including Disney+ offer will be available in Polsat Box (pay TV), in Plus network (mobile services), in Netia (fixed-line Internet access and packages with TV services) and in Polsat Box Go.

## Development of onshore wind energy? Poles in favor of this

The survey conducted by Kantar at the beginning of June indicates that 79% of Poles supports the changes in law which would facilitate construction of onshore wind farms.

In the opinion of 71% of the respondents, the wind power is a chance to become independent from fuels delivered by Russia, thus increasing the energy security of the country.

Respondents decided that the growth of wind power production will not affect the value of electricity bills (42%). According to 29% of respondents, as the wind power industry grows the electricity bills will be lower, and 11% of them claimed that in such a case the prices of energy will grow.

In 2016, a special rule was introduced to the Polish legislation, the so-called 10H rule, according to which the distance from the buildings to the windmill should equal at least 10 times its height. Currently the work is in progress on allowing construction of wind farms at the distance which is not smaller than 500 meters from the nearest buildings, if a given municipality agrees to abolish the above mentioned 10H rule.

Depending on the adopted scenario of development of the onshore wind energy, it is estimated that up to 10 GW of new capacity could be created until 2030, and the estimated cumulative GDP growth on this account would amount to PLN 70-133 billion by 2030. On top of that, it is assumed that the development of onshore wind energy would have a positive impact on the labor market (up to 97 thousand of new jobs in the years 2020-2030) and on the CO<sub>2</sub> emission levels (down by 42% in the period of 2020-2030).

## Decision of Cyfrowy Polsat S.A. to establish collateral for the liabilities of Great Wind sp. z o.o. resulting from the agreement to supply and install wind turbines and to grant a loan

In view of the fact that:

- Cyfrowy Polsat S.A. (the “**Company**”) is a party to the preliminary agreement concluded with ZE PAK S.A. with its registered office in Konin (“ZE PAK”), concerning the Company’s purchase of shares in PAK-Polska Czysta Energia sp. z o.o. with its registered office in Konin (“**PAK-PCE**”), representing 67% of PAK-PCE’s share capital, of which the Company informed in its [current report no. 38/2021](#) dated 20 December 2021;
- on June 10, 2022 PAK-PCE acquired 100% of shares in the share capital of Great Wind sp. z o.o. (the „**Project Company**”) in order to construct and operate an on-shore wind installation in the form of a group of 33 wind turbines within the commune of Człuchów, Człuchów county, Pomeranian voivodship, with the potential to construct a photovoltaic farm within the obtained connection capacity of the project (the “**Investment Project**”), of which ZE PAK informed in its current report no. 21/2022 dated 10 June 2022,

the Management Board of the Company hereby informs that on 10 June 2022 it took a decision to grant sureties or guarantees by the Company to a company of Vestas Group (“**Vestas**”) in order to secure the liabilities of the Project Company resulting from the agreement concerning the supply and installation of wind turbines by Vestas (the “**Guarantees**”). The Guarantees will be established in order to enable the execution of the Investment Project. The amount of the Guarantees shall not exceed EUR 96,000,000 (say: ninety six million euro).

Concurrently, the Management Board of the Company decided to grant a loan by the Company to PAK-PCE in the amount not exceeding the equivalent of PLN 236,400,000.00 (say: two hundred thirty six million four hundred thousand zlotys) (the “**Loan**”) in order to enable the execution of the Investment Project.
