End of Polsat's Mobile TV. New channels can be placed on MUX-4 multiplex

In the face of change of the broadcasting standard for digital terrestrial TV from DVB-T to DVB-T2, Polsat Box (a Polsat Plus Group company) decided to discontinue offering its Mobile TV service.

Mobile TV was a scrambled package of channels offered via digital terrestrial TV in DVB-T standard. The service has been offered since 2012, however it was not actively promoted for many years.

The service will be phased out gradually, in accordance with the schedule of migration of digital terrestrial TV to the new standard in Poland.

Other channels will appear in the slots that were occupied by Mobile TV on the MUX-4 transponder. The information about the new channels will be provided by the operator in due time.

Orange Polska to build a 5G core network together with Ericsson

Orange Polska has signed a 5-year contract with Ericsson for the implementation of a dedicated 5G Stand Alone core network solution in order to enable provision of the full spectrum of the anticipated 5G services to the operator's customers.

As has been stressed in the press release, the solution chosen by the operator relies on a cloud mechanism and it is a multi-system solution. This means that 4G LTE and 5G technologies in the Non-Stand Alone mode as well as 5G in Stand Alone mode will be supported by one and the same core network.

Wind farms to be built in the Baltic Sea

ZE PAK and Ørsted have signed a contract for joint construction of a wind farm in the Polish part of the Baltic Sea.

The partners intend to file a joint application for a location permit and they plan to create a regional Fund for Fair Transformation for Eastern Wielkopolska region which is an areas where ZE PAK operates. The fund will have a budget of ca. PLN 50 million (EUR 10 million) at its disposal.

ZE PAK is one of the key electricity producers in Poland and the biggest employer in Eastern Wielkopolska region. ZE PAK's strategy assumes withdrawal from producing electricity in coal-based power plants and replacing it with clean energy by 2030.

Ørsted is a utility company controlled by the Danish government. It is the world's biggest producer of offshore wind power. At present Ørsted owns 28 offshore wind farms offering 7.6 GW of power. The company's goal is to have a portfolio of operating offshore wind farms generating 15 GW of power by 2025 and 30 GW by 2030.
