The telecom had 564 thousand customers using fiber-optic access (+41.4% y/y/ and + 44 thousand q/q). There are 4.4 million households (+189 thousand q/q) within the fiber-optic lines' coverage area of (includes both, own and third party lines). In further quarters of the year Orange does not exclude the possibility of negative impact of COVID-19 epidemics on sale of subscriptions based fiber-optic access.

The number of pay TV customers was 94 thousand. It was stable compared to the preceding quarter (the decrease of the number of customers using satellite TV service was offset by growth of the number of web TV users).

As regards the Q1 results, part of performance for March was under the influence of the coronavirus epidemics. As Orange sees the situation, in the current circumstances, in which data transmission and voice calls have become much more important than ever before, the telecommunication industry is in a favorable situation as compared to other sectors of the economy.

UKE President is arguing with the Ministry of Digital Affairs as regards cancellation of the 5G spectrum auction – the government did not consult the decision with him

by tw

In connection with the coronavirus epidemics, the government has adopted the draft of the so-called “Anti-Crisis Shield 3.0” document. It includes the regulations which cancel the auction for the 5G-dedicated spectrum.

While justifying the proposal, the Ministry of Digital Affairs noted that suspension of the auction by the regulator (UKE), which took place earlier, could undermine the legal basis for the whole procedure.

In the issued statement UKE President informed that the regulations regarding cancellation of the 5G auction, found in the proposed “Anti-Crisis Shield 3.0” document, had not been consulted with him. He reminded that the decision regarding suspension of the auction was made on the grounds of the regulations which are part of the so-called “anti-COVID” act, which stated that “for the duration of the epidemic hazard or the state of epidemics, announced due to COVID, the procedural and court time limits in (...) other proceedings conducted on the basis of acts of parliament do not start running, while any time limits that have started running are suspended for such a period.” According to UKE President, in the face of these new rules the auction will not be completed this year.

In addition, the “Anti-Crisis Shield 3.0” imposes on UKE the duty of defining, in the draft spectrum reservation decisions, the requirements related to a telecommunication network’s security and integrity, while beforehand submitting these requirements for review to the cybersecurity board.

UKE President reminded that when preparing the rules of the auction he addressed a question to the Minister of Digital Affairs regarding the issue of the necessity of including the requirements concerning cybersecurity in the auction’s documentation. The response he received at that time was negative.

Polsat Group acquires Interia

Telewizja Polsat (Polsat TV) has concluded a preliminary agreement with Bauer Media Group for the purchase of Interia Group. It is a strategic decision from the point of view of Polsat Group's development, which will contribute to achieving its significant position on the Internet. Upon finalization of the transaction, which is contingent on Telewizja Polsat obtaining the approval from the anti-trust authority, Interia Group will become a member of Polsat Group, the biggest media-and-telecommunications group in Poland and in the region.

"We are a Polish company and we are proud to be the leader of the media-and-telecommunications market in Poland. Acquisition of Interia Group is yet another strategic investment into the development of our Group. Interia Group is a leading player in this segment. We are excited about the enormous scale of opportunities and synergies generated by this investment. We count on Interia's dynamic development," said Mirośław Błaszczuk, CEO of Cyfrowy Polsat S.A. and Polkomtel Sp. z o.o.

Interia Group is at present among the top three Internet players in Poland, both in terms of the actual number of users and the number of page views, while also being the leader in terms of growth dynamics. Interia Group is a leading player on the Polish market of new generation media, reaching nearly 60% of Internet users in Poland. Its services are used by over 16 million real users every month. The number of page views of the Interia Group's websites exceeds 1.3 billion per month. Belonging to the group Internet portal Interia.pl, being one of the three largest horizontal portals in Poland, provides individual Internet users with a vast selection of the highest quality information, multimedia, social and communication services.

"Interia Group is a very successful business but we must be sure that we are clearly focused on our key strategic priorities. That is why we are glad that we can sell Interia Group to Polsat Group, which is a very good strategic solution. We would like to thank Artur Potocki, the President of the Management Board, as well as the whole Interia team for the consistent and successful development of the business while wishing them all the best!" said Veit Dengler, COO of Bauer Media Group.

For Polsat Group acquisition of Interia is a strategic investment in the area of the Internet. It substantially strengthens the Group's position on the dynamically growing online advertising market. It also creates an additional channel for distribution and monetization of the content which is currently produced for the needs of the 34 channels which bear the Polsat logo. For Polsat Group Interia will also be the main area for marketing the entire portfolio of Polsat's products and services in the Internet, including such brands as Plus, Cyfrowy Polsat, IPLA, Netia, or Polsat TV brands. Polsat Media, in turn, can support sale of Interia's advertising space.

The transaction will be fully financed from Telewizja Polsat's own funds.

Transaction finalization is contingent on Telewizja Polsat obtaining the consent for the concentration from the President of UOKiK (the Polish Office of Competition and Consumer Protection).

Greenberg Traurig Grzesiak sp.k was the legal advisor of Telewizja Polsat, with Trigon acting as its financial advisor.

200 000 coronavirus tests donated to Polish citizens by Zygmunt Solorz and Polsat Group

Zygmunt Solorz and Polsat Group spent over PLN 16 million to buy 200 thousands tests confirming presence of coronavirus together with the necessary laboratory equipment. The tests will be donated to Polish citizens and provided to the Ministry of Health in order to improve the capability of testing, identifying and isolating the infected, and will be a key factor in fighting the coronavirus epidemic in Poland.

Polsat Group and Zygmunt Solorz, who is the founder and major shareholder of the Group, decided to purchase 200 thousand genetic tests confirming the presence of coronavirus, used by all laboratories performing official tests for the Ministry of Health. The purchase also included 8 diagnostic devices, that is thermal cyclers and automatic extraction systems together with genetic tests and all the consumables necessary for conducting 200 thousand tests. These are complete diagnostic sets. All tests and reading devices will be donated to the society thanks to the involvement of Minister Sławomir Gadomski from the Ministry of Health, consultations of Professor Andrzej Horban, a national consultant in the field of infectious diseases and thanks to Mr. Sławomir Gnalicki, the President of Argenta, a supplier of tests and devices.

“I believe that in our fight against the coronavirus, testing - that is identification of the infected and their subsequent isolation – is the most important aspect. Thanks to this we may be able to restrict the spread of the virus, and in the end – win our fight with the epidemic” – says Zygmunt Solorz.

So far, around 340 thousand coronavirus tests have been made in Poland. An additional 200 thousand tests with diagnostic equipment, i.e. eight sets of diagnostic devices, will help increase the capability of testing for coronavirus detection in Poland. This means a significant growth of testing potential in Poland.

“I've been working on it for several weeks. I am glad that finally the supply of tests and devices has begun. I know that at present there is a gradual “defrosting” of the economy and a return to everyday, normal life. However, we still need to remember that the epidemic is with us and among us. That is why it is so important to maintain safety measures and principles, but at the same time testing - fast and massive. The sooner and more infected people can be found among us, the better for us all”, adds Zygmunt Solorz.

Testing and diagnostics will be carried out by laboratories designated by the Ministry of Health. The first batch of test and laboratory equipment has been already delivered to the Ministry of Health. All tests and equipment will be made available by the end of May.

"I am very pleased with cooperation with Mr. Zygmunt Solorz and the fact that we were able to use the potential of our company and become a part of this noble cause, so important to all of us" – said Sławomir Gnalicki, President of the Management Board of Argenta.

"It is a very difficult time for all of us and we must help each other. We are a Polish company – we would like and we should provide our help in fight against the epidemic. I've decided for the first time that we would help on such a large scale. We donate 200 thousand tests together with the equipment hoping that this will support heroic activities of the Polish medical services. I would like to thank all of them very much, in particular those working on the front lines" – sums up Zygmunt Solorz.
